

Vision Definition

July 2015

A Vision is a word picture of where our congregation seeks to be in five years. It is a portrait of what the congregation can become, enabling us to move from where we are today to a new reality.

The Vision describes how UCM will look in five years if we faithfully live into our Mission. It is a *shared* Vision, created collaboratively by the people of the congregation.

A Vision creates new ways of thinking and acting. It is empowering and inspiring. It contains sufficient detail to offer clear guidance for long term strategic planning, as well as specific outcomes so we will know in five years how well we have achieved our Vision.
